

Fact Sheet

Scope.

Fusepool SME provides data for better product/service development and research:

- PartnerMatch: How to find the right business partners?
- FundingFinder: Where to get funding for research?
- PatentExplorer: What is patented in my product area?
- JournalExplorer: What prior art exists in my product area?

Advanced functionalities beyond autocomplete search and faceted browsing:

- Graph browsing to explore related and new information
- Classifiers make search results more relevant for the user
- Landscape view for visual analytics of large result sets
- Reweighting data sources based on user feedback
- Predicted labels and user-customized labels
- Adaptive user interfaces for context and role

Fusepool integrates patents, journal articles, funding descriptions, and descriptions of people and organizations (profiles). The data is provided by multiple publishers, such as the Information Retrieval Facility and the US National Library of Medicine.

Investors.

Fusepool SME was selected from over 300 submissions and is now part-funded by the European Framework Program for Innovation under grant number 296192.

Facts.

Coordinator contact: Dr. Michael Kaschesky

Project duration: 1 July 2012 to 30 June 2014
